

SmyanSoft at a glance

SmyanSoft

“We are a global leader in partnering with companies to transform and manage their business. With over seven years of experience in managing the systems and workings of global enterprises, we expertly steer our clients through their digital journey. We infuse intelligence in the products, operations, and services combining our engineering, technology, IT, data and consulting talents.”

Our approach is what sets us apart.

Client proximity

We build lasting, trusted relationships by embedding operations within your metro markets and working together to serve as caring neighbors. Our experts draw on a diverse global network to bring the right talent, innovation and scale to every engagement. Using a collaborative style and consultative approach, we help you envision and plan for new possibilities.

Industry expertise

With deep expertise in technologies and the industries we serve, our consultants help navigate complex challenges with practical solutions. We develop blueprints that map your industry’s operating architecture to our offering roadmap to ensure we customize and adapt solutions for your unique needs. As industry lines continue to blur, we also bring forward lessons learned and innovation solutions from our work across industries.

Range of services

Our secure and flexible end-to-end services include strategic IT and business consulting, systems integration, **IT managed services, cybersecurity, data analytics & AI, business process services, engineering** services and intellectual property solutions. Our business consulting focuses on ways to improve business agility and manage change, for example, while our intellectual property helps accelerate innovation. We use our systems integration capabilities to advance clients’ IT modernization efforts, and our managed IT and business process services help clients mitigate cost pressures while driving more value from their technology supply chains.
